SINAGLIKHA

Senior Manager Handover Guide

How to use the SINAGLIKHA website as a Senior Manager, explained department by department: Staffing and Recruitment, Training and Development, Employee Engagement, Total Rewards, and Legal Compliance.

Website	https://sinaglikha-website.vercel.app/
Senior Manager sign in	https://sinaglikha-website.vercel.app/members/
Employee Portal	https://sinaglikha-website.vercel.app/employees/
Prepared	November 2026

1. What this website does

SINAGLIKHA has one public website and two private areas. Everything private sits behind a sign in.

Area	Who uses it	What it is for
Public website	Anyone	The company story, the team, and the News and Files section, which shows items a Senior Manager has Published for Everyone.
Senior Manager area (/members/)	Senior Managers and the Administrator	Where you run your department: 201 Files, the Content Manager, Restricted Records, and Accounts. Staffing and Recruitment also has the Employee Directory.
Employee Portal (/employees/)	Employees	Employees sign in with an Employee ID and a PIN. They see announcements, a community forum, their own attendance, learning, their own compensation records, and the files you Publish for them.

The golden rule

Nothing reaches employees or the public until you **Publish** it and choose its audience. Drafts, Unpublished and Archived items stay hidden. Employees can never see the 201 Files, evaluation results or disciplinary cases.

Who is who

Role	What it means
Senior Manager (SM)	One of the five department heads. Every SM can view and edit every department's content, with the restricted exceptions in section 3.
Administrator	The owner's hidden account. Sets each SM's department and role, and is not visible in any list.
Employee	Signs in to the Employee Portal. Can read what is Published for them, record their own attendance, post in the forum, and read their own compensation records.

2. Getting started (every Senior Manager)

Signing in

1. Open your invitation email from the Administrator and set your password. Invitations are the only way in; there is no public sign up.
2. Go to **/members/** and choose **Senior Manager** at the top of the sign in box. (Employees choose **Employee** and are taken to their own page.)
3. Sign in with your email and password. If you forget your password, use the reset link on the sign in page.
4. If you see a note about no department, ask the Administrator to set yours in the Accounts tab. Some screens stay closed until your department is set.

Your profile

Open your profile from the top of the page to change your name, your photo (camera icon to add, bin icon to remove) and your password. Your photo and name appear beside every announcement you write.

The tabs you will see

Tab	What it holds	Who sees it
201 Files	The private employee file library. Upload, create folders, download, delete.	Staffing and Recruitment, Legal Compliance
Content	Everything each department publishes: documents, programs, forms, announcements, attendance, learning and the forum.	Every SM
Employees	The Employee Directory: add employees, issue PIN activation codes, deactivate.	Staffing and Recruitment
Records	Restricted Records: compensation, evaluation results, disciplinary cases.	Every SM, with limits (section 3)
Accounts	Invite, deactivate or reactivate other Senior Managers.	Every SM

The Content tab: how publishing works

1. Open **Content**. You will see five department panels. Each row is a deliverable with a short description. A **needs attention** strip at the top shows what applies to you, such as drafts waiting or attendance to review.
2. Open a deliverable. Use the **plus** icon to upload a file (up to 50 MB), add a link, or create a folder. Items start as **Draft**.
3. When ready, press the **eye** icon to **Publish**. Choose the audience: **Managers only**, **Employees**, or **Everyone** (the public website). Only deliverables marked as public-capable offer Everyone.
4. To take something down, use **Unpublish** (comes back as an Unpublished item) or **Archive**. Nothing is lost.
5. Hover any icon to see its label. Actions are icons only to keep screens tidy.

> **Remember**
> Every upload, publish, edit and delete is written to an activity log that the Administrator can read. Work as if every action is recorded, because it is.

3. Who can do what

The rule: **all five Senior Managers can view and edit every department's content**. The exceptions are the private records below, which are locked by the database itself, not just hidden on screen.

Area	Staffing & Recruit.	Training & Dev.	Employee Engage.	Total Rewards	Legal Compl.
Content (all 17 deliverables): view and edit	Yes	Yes	Yes	Yes	Yes
201 Files: open, upload, delete	Yes	No	No	No	Yes
Employee Directory and PIN codes	Yes	No	No	No	No
Attendance: review and correct	Yes	No	No	No	No
Forum: moderate, reports, categories	No	No	Yes	No	No
Compensation records: view	Yes	Yes	Yes	Yes	Yes
Compensation records: upload	No	No	No	Yes	No
Evaluation result files (Records): view and upload	No	No	No	Yes	No
Scorecards and evaluations: build, evaluate, export	No	No	No	Yes	No
Disciplinary cases: view	Yes	Yes	Yes	Yes	Yes
Disciplinary cases: upload	No	No	No	No	Yes
Write announcements	Yes	Yes	Yes	Yes	Yes
Invite or deactivate Senior Managers	Yes	Yes	Yes	Yes	Yes

What employees see

- Their own attendance and compensation records.
- Published items for Employees or Everyone, Published announcements, and the forum.
- Employees **never** see their own evaluation results or disciplinary cases, other people's records, the 201 Files, or anything marked Managers only.

Only the Administrator can change a Senior Manager's department or role. If someone moves to a different department, ask the Administrator to update it and your access follows automatically.

SENIOR MANAGER DEPARTMENT

Staffing and Recruitment

Finding and welcoming the right people.

Your deliverables

Deliverable	What you do there
Company Files	Company documents for the team. Can be shared with the public if you choose Everyone.
Talent Management Flow	Talent management flowcharts and the files that support them.
Attendance Tracker	Review and correct employees' time in and time out. Download a month as a spreadsheet.

Your special access

- **201 Files** (shared with Legal Compliance): the private library of each employee's file.
- **Employee Directory**: the only people who can add employees and issue sign in codes.
- **Attendance**: the only people who can review and correct time records.

Onboarding a new employee

There are two ways to add people. Either way, a new person has **no PIN yet**: they cannot sign in until you give them an activation code (step C).

A. Add one employee by hand

1. Open the **Employees** tab and press the **person-plus** icon.
2. Enter the **Employee ID** (three capital letters, a dash and four digits, for example **SNG-0001**), the **full name**, and optionally the **position**. Press **Save**.
3. If the ID already exists you will see "That Employee ID already exists". Pick the next free number. The ID cannot be changed later; name and position can (pencil icon).

B. Add many employees from a CSV file

1. Prepare a spreadsheet and save it as **CSV** (in Excel: Save As, CSV). Use three columns in this order: **Employee ID, Full Name, Position**. A header row is optional; if you include one, the column names can be Employee ID, Full Name and Position.
2. Keep the file under **1 MB**. Every ID must look like SNG-0001 and each person needs a name. The position can be left blank.
3. In the Employees tab press the **file-up** (import) icon and choose your CSV file.
4. A confirmation shows how many people will be imported and how many rows will be skipped, with the reason (a bad ID, no name, or an ID listed twice in the file). People whose ID already exists are left exactly as they are, so it is safe to import the same file twice.
5. Press **Import**. You will see how many were added.

Employee ID	Full Name	Position
SNG-0001	Juan Dela Cruz	Customer Service
SNG-0002	Maria Santos	Accounting Assistant

Example of a CSV file as it looks in a spreadsheet.

C. Give them their activation code

1. For one person, press the **key** icon on their row. For everyone who has no PIN yet (the usual case after an import), press the **key** icon at the top of the Employees tab, labelled **Codes for everyone without a PIN**.
2. Confirm. A page of slips opens, one per person, showing the **Employee ID, full name and activation code**, and when it expires (7 days). Press **Print** and hand each slip to its owner privately.
3. The codes are shown **once**, on that page. If you close it before printing, simply issue new codes.
4. The employee goes to **/employees/**, chooses **First time here?**, enters their Employee ID and the code, and creates a 6 digit PIN. After that they sign in with ID and PIN.
5. Upload their paperwork to the **201 Files** tab in their own folder.

Day to day

- **Lost PIN?** Press the key icon again to issue a new code. This removes the old PIN, clears any lock and signs them out everywhere.
- **Locked out?** Five wrong PINs lock an account for 15 minutes. A new code unlocks it straight away.
- **Attendance corrections:** open Attendance from the Content tab, pick the day, and correct a record. Every correction is logged. Times are in UTC+8.
- **Monthly attendance:** use the **download** icon to get the month as a spreadsheet.
- **Someone leaves: Deactivate** them in the Directory. They are signed out at once and can no longer sign in. You can reactivate later with a new code.

Handling codes
The activation code is shown only once and is never stored in readable form. If you lose it, simply issue a new one. Hand printed slips over privately and never post codes in a group chat.

SENIOR MANAGER DEPARTMENT

Training and Development

Building skills for a future-ready workforce.

Your deliverables

Deliverable	What you do there
Training Materials	Slides, guides and other learning resources. Upload and Publish for Employees.
Learning Management System	Courses and modules that employees complete, with progress tracking.
Career Development Program	Programs and opportunities for growing a career at SINAGLIKHA.

Building a course

1. Open **Content**, then **Learning Management System**.
2. Press **plus** to create a **course**: a title and a short description.
3. Open the course and add **modules**. A module is a link (a video, an article, a form) or a file.
4. Switch the course to **Published** when it is ready. Employees see it in the **Learning** box on their dashboard and mark modules complete as they finish. Only they can see their own progress.
5. Open the course any time to see how many people have finished each module.

Good habits

- Keep one course per skill and name modules clearly (for example, "Module 1: Welcome to SINAGLIKHA").
- Use Draft while you build. Only Publish when the whole course is ready.
- Retire old material with **Archive** rather than deleting, so you can bring it back.

SENIOR MANAGER DEPARTMENT

Employee Engagement

Culture, communication, and community.

Your deliverables

Deliverable	What you do there
Announcements	Write a post for every employee. It shows your name, department and photo, and can carry files.
Communication Materials	Posters, newsletters and other announcements as files.
Employee Forum	Moderate the community: reports, hiding, locking, categories.
Daily Engagement Activity	The activity of the day, with its instructions.
Engagement Activity: CSR	Community activities and their photos. Can be shared publicly.
Wellness Program	Wellness programs and learning material.

Writing an announcement

1. Open **Content**, then **Announcements** in the Employee Engagement panel (any Senior Manager can also do this).
2. Press **plus**. Add an optional title and write your message in plain text.
3. Attach up to 5 files if you like (PDF, image, Word, Excel, PowerPoint, text or CSV).
4. Press **Post**. Employees see it on their dashboard straight away, with your name and photo.
5. To correct or take one down: **pencil** to edit, **eye-off** to hide without deleting, **bin** to delete (its files are removed too).

Moderating the forum

Employees post and reply on their dashboard, under **Community**. Employees can delete their own posts and report anyone else's. You manage everything from **Employee Forum** in the Content tab:

- **Reports** tab: every report with what was reported. Review it, then press the **check** icon to mark it dealt with.
- **Hide** a thread or reply to take it off the dashboard but keep the record, **lock** a thread to stop new replies, or **delete** it for good.
- **Categories**: add, rename, reorder, or close a category. Employees can only post in open categories.
- Posts show the author's real name, so most issues are best handled with a quick word.

Good to know
A post an employee deletes is only hidden, not erased. You can still find it in the thread list under Hidden if a report needs it.

SENIOR MANAGER DEPARTMENT

Total Rewards

Fair pay, benefits, and recognition.

Your deliverables

Deliverable	What you do there
Compensation Packages	General compensation and benefits information (not individual pay).
Performance Management System	Build your own scorecards and evaluate employees against them. Private to Total Rewards and the Administrator.
Incentive Plan Design	Incentive and recognition plan information.

Your special access: Restricted Records

- **Compensation**: you are the only department that uploads individual compensation records. All Senior Managers can view them.
- **Evaluation results**: only you can open and upload them. No other Senior Manager and no employee can see them.

Uploading an individual record

1. Open the **Records** tab and choose **Compensation** or **Evaluation Results**.
2. Press **plus**, choose the employee from the list, give the record a title and period (for example, "Payslip, Oct 1 to 15"), and attach the file.
3. Compensation records appear in that employee's own **My compensation records** box, visible to them alone. Evaluation results never appear to employees.
4. Each time anyone opens a record it is logged.

Building a scorecard

1. Open **Content**, then **Performance Management System** in the Total Rewards panel, and choose the **Scorecards** tab.
2. Press **plus**. Give the scorecard a name (for example, Quarterly Performance Review) and choose the rating scale, from 1 to 3 up to 1 to 10. Optionally name each rating (for example, 5 = Outstanding).
3. Add your **criteria**: a title (for example, Quality of work), an optional note on what good looks like, and a **weight** from 1 to 100 for how much it counts. Use the arrows to reorder and the cross to remove.
4. Press **Save**. Editing a scorecard later only affects new evaluations. Evaluations already written keep their own copy. Use the eye icon to hide a scorecard you no longer use.

Evaluating an employee

1. In the **Evaluations** tab press **plus**. Choose the employee, the scorecard, and the period (for example, 2026 Q4), then press **Start**.
2. Rate each criterion by pressing a number, and add a comment if you like. The weighted score updates as you go. Add overall comments at the bottom.

3. Press **Save draft** to carry on later, or **Finalise** once every criterion is rated. A finalised evaluation is locked.
4. To change a finalised evaluation, open it and press **Reopen**. This is written to the activity log. Only drafts can be deleted.
5. To keep a copy, press the **download** icon at the top of the Evaluations tab for a spreadsheet (CSV) of the evaluations shown, one row per employee with each criterion rating and comment. It opens in Excel. Search first to export only some. To print or save one evaluation as a PDF, open it and press **Print or PDF**. Every export and print is written to the activity log.
6. Employees do **not** see their evaluations, and no other Senior Manager can open them.

Older results

Results you already have as files can still be kept in the **Records** tab under Evaluation Results. The scorecards are separate.

> **Before you press save**
> Double check the employee before you upload. A compensation record goes straight to that one employee's dashboard.

SENIOR MANAGER DEPARTMENT

Legal Compliance

Fair, lawful, and safe workplaces.

Your deliverables

Deliverable	What you do there
Employee Handbook	The current handbook, with its versions. Publish the latest for Employees.
Guidelines for Disciplinary Action	The approved guidelines for disciplinary action.
Risk Mitigation Plan	Management only by default. It stays Managers only until you pick another audience.

Your special access

- **201 Files** (shared with Staffing and Recruitment): open, upload and delete.
- **Disciplinary cases**: you are the only department that uploads them. Every Senior Manager can view them. Employees never see them.

Recording a disciplinary case

1. Open the **Records** tab and choose **Disciplinary Cases**.
2. Press **plus**, choose the employee, add a clear title and period, and attach the case file.
3. Opening any case is logged with who opened it and when.

Handbook versions

1. Open **Employee Handbook** and upload the new version with its version label.
2. Publish it for **Employees**, then **Archive** the old one. Employees only see Published items.

Handle with care
Disciplinary cases are the most sensitive record in the system. Never copy them into chat messages or email. Share the Records link instead and let the access rules do their work.

5. Routine checklist

When	Who	What
Daily	Staffing and Recruitment	Check the needs attention strip for attendance to review. Fix missing time outs.
Daily	Employee Engagement	Open the Forum reports. Mark each dealt with. Post the day's activity.
Weekly	Training and Development	Check course progress. Publish new modules.
Weekly	Every Senior Manager	Clear your drafts: Publish or Archive them.
Per pay period	Total Rewards	Upload compensation records for each employee.
Per evaluation round	Total Rewards	Evaluate each employee with the scorecard and finalise. Upload paper results in Records if needed.
As needed	Legal Compliance	Upload disciplinary cases. Publish the latest handbook.
Monthly	Staffing and Recruitment	Download the monthly attendance spreadsheet.
Monthly	Every Senior Manager	Check Accounts: deactivate anyone who has left.

Working safely

- Use a strong, unique password and never share it. Sign out on shared computers.
- Never post personal data in announcements or the forum. Use Restricted Records for anything individual.
- Choose the audience deliberately. **Everyone** puts an item on the public website.
- Prefer Archive over delete. Delete cannot be undone.
- Employees' PIN and activation codes are private. Never ask an employee to tell you their PIN.

6. When something goes wrong

Problem	What to do
I cannot open the 201 Files or Employees tab	Those tabs only show for Staffing and Recruitment (and Legal for 201 Files). Ask the Administrator to check your department.
An employee cannot sign in	Check they are Active in the Directory, then issue a new activation code. A lock clears after 15 minutes or with a new code.
A file will not upload	Check it is under 50 MB and an allowed type. Try again. If it keeps failing, tell the Administrator.
Employees cannot see something I published	Check its status is Published and the audience is Employees or Everyone, not Managers only.
A page says it is not set up yet	A one time database step is missing. Tell the Administrator; the setup notes list each one.
Someone posted something inappropriate	Open Employee Forum, hide the thread or reply, and handle it with the person.
I think my account was used by someone else	Change your password at once and tell the Administrator, who can review the activity log.
Who can help	The Administrator (the website owner) sets departments and roles, runs setup steps and reads the activity log. Technical setup is in docs/members-setup.md.
